<i>The Smart Wife</i> -Yolande Strengrs 2020-09-01
A bold dive into the problematic development (and developers) of "smart wives"--feminized digital assistants who are friendly, sometimes flirty, docile, efficient, occasionally glitchy, and perpetually available. Meet the Smart Wife--at your service, an eclectic collection of feminized AI, robotic, and smart devices. This digital assistant is friendly and sometimes flirty, docile and efficient, occasionally glitchy but perpetually available. She might go by Siri, or Alexa, or inhabit Google Home. She can keep us company, order groceries, vacuum the floor, turn out the lights. A Japanese digital voice assistant--a virtual anime hologram named Hikari Azuma--sends her "master" helpful messages during the day; an American sexbot named Roxxy takes on other kinds of household chores. In The Smart Wife, Yolande Strengrs and Jenny Kennedy examine the emergence of digital devices that carry out "wifework"--domestic responsibilities that have traditionally fallen to (human) wives. They show that the principal prototype for these virtual helpers--designed in male-dominated industries--is the 1950s housewife: white, middle class, heteronormative, and nurturing, with a spick-and-span home. It's time, they say, to give the Smart Wife a reboot.
<i>Ctrl, Alt; Delete</i> -Emma Gannon 2016-07-07
Emma Gannon was born in 1989, the year the World Wide Web was conceived, so she's literally grown up alongside the Internet. There've been late night chat room experiments, sexting from a Nokia and dubious webcam exchanges. And let's not forget catfishing, MSN, digital friendships and #feminism. She was basically social networking way before it was a thing - and she's even made a successful career from it. Ctrl Alt Delete is Emma's painfully funny and timely memoir, in which she aims to bring a little hope to anybody who has played out a significant part of their life online. Her confessions, revelations and honesty may even make you log off social media (at least for an hour).

<i>The Science of Cancer</i> -Scientific American Editors 2017-03-20
The past few years have seen tremendous strides in our understanding of cancer, including new hypotheses about its genetic origins and new treatment alternatives using the body's own immune response. In this eBook, The Science of Cancer, we examine what we know and what we're finding out about this scourge of humankind. We delve into the molecular basis and complex causes of cancer, the arguments for and against screenings, new and targeted therapies, and minimizing risk. In "How Cancer Arises," Robert Weinberg presents what has been the central dogma of cancer genetics, which says that a handful of essential mutations in specific genes lead to tumor growth; however, recent discoveries are challenging this theory, as we see in "Untangling the Roots of Cancer" and "Stem Cells: The Real Culprits in Cancer?" Early detection of cancer is important for treatment, but not all screening tests are created equal. In "The Great Prostate Cancer Debate," Mark Garnick lays out the controversy over the value of the prostate-specific antigen test for prostate cancer and the rationale against screening. With our increasing knowledge of cancer's causes, exciting targeted therapies are on the rise, including homing in on stem cells, making use of viruses, and manipulating the immune system as we see in "A New Ally against Cancer," which focuses on treatment with therapeutic vaccines. Does this mean a cure is around the corner? Perhaps not, according to Scientific American Editor Dina Fine Maron in "Can We Truly 'Cure' Cancer?" But with remission rates rising for certain types of cancers and with new discoveries opening up further avenues of research, there is reason for optimism.
<b>The Global Brain</b> -Satish Nambisan 2010
All the talk about "open innovation" and externally-focused innovation assumes that "one size fits all" in terms of what network-centric innovation is and how companies should harness external creativity. But the reality is that there is no one right way to master this tool. For instance, loosely governed community-based innovation projects are a very different animal from tightly-orchestrated development projects driven by a large firm. As the landscape of network-centric innovation becomes more diverse and more confusing, there is a desperate need to structure the landscape to better understand different models for network-centric innovation. This book brings clarity to the confusion. Further, it argues that managers cannot rely on anecdotal success stories they read about in the press to implement a network-centric innovation strategy. They need rigorous and analytical advice on what role their company should play in an innovation network, what capabilities they need to create, and how they need to prepare their organization for this significant shift in the innovation approach. This book offers a practical and detailed roadmap for planning and implementing an externally-focused innovation strategy.
<i>The Future of Competition</i> -C. K. Prahalad 2004-02-18
In this visionary book, C. K. Prahalad and Venkat Ramaswamy explore why, despite unbounded opportunities for innovation, companies still can't satisfy customers and sustain profitable growth. The explanation for this apparent paradox lies in recognizing the structural changes brought about by the convergence of industries and technologies; ubiquitous connectivity and globalization; and, as a consequence, the evolving role of the consumer from passive recipient to active co-creator of value. Managers need a new framework for value creation. Increasingly, individual customers interact with a network of firms and consumer communities to co-create value. No longer can firms autonomously create value. Neither is value embedded in products and services per se. Products are but an artifact around which compelling individual experiences are created. As a result, the focus of innovation will shift from products and services to experience environments that individuals can interact with to co-construct their own experiences. These personalized co-creation experiences are the source of unique value for consumers and companies alike. In this emerging opportunity space, companies must build new strategic capital—a new theory on how to compete. This book presents a detailed view of the new functional, organizational, infrastructure, and governance capabilities that will be required for competing on experiences and co-creating unique value.

<i>Wish Lanterns</i> -Alec Ash 2017-03-07
"One of the best [books] I've read about the individuals who make up a country that is all too often regarded as a monolith." —Jonathan Fenby, Financial Times If China will rule the world one day, who will rule China? There are more than 320 million Chinese between the ages of sixteen and thirty. Children of the one-child policy, born after Mao, with no memory of the Tiananmen Square massacre, they are the first net native generation to come of age in a market-driven, more international China. Their experiences and aspirations were formed in a radically different country from the one that shaped their elders, and their lives will decide the future of their nation and its place in the world. Wish Lanterns offers a deep dive into the life stories of six young Chinese. Dahai is a military child, netizen, and self-styled loser. Xiaoxiao is a hipster from the freezing north. "Fred," born on the tropical southern island of Hainan, is the daughter of a Party official, while Lucifer is a would-be international rock star. Snail is a country boy and Internet gaming addict, and Mia is a fashionista rebel from far west Xinjiang. Following them as they grow up, go to college, find work and love, all the while navigating the pressure of their parents and society, Wish Lanterns paints a vivid portrait of Chinese youth culture and of a millennial generation whose struggles and dreams reflect the larger issues confronting China today.

*Between Two Fires*-Joshua Yaffa 2020-01-14

WINNER OF THE ORWELL PRIZE • NEW YORK TIMES EDITORS' CHOICE • “Unforgettable . . . a book about Putin’s Russia that is unlike any other.”—Patrick Radden Keefe, author of Empire of Pain From a Moscow correspondent for The New Yorker, a groundbreaking portrait of modern Russia and the inner struggles of the people who sustain Vladimir Putin’s rule ONE OF THE BEST BOOKS OF THE YEAR—NPR, Kirkus Reviews In this rich and novelistic tour of contemporary Russia, Joshua Yaffa introduces readers to some of the country’s most remarkable figures—from politicians and entrepreneurs to artists and historians—who have built their careers and constructed their identities in the shadow of the Putin system. Torn between their own ambitions and the omnipresent demands of the state, each walks an individual path of compromise. Some muster cunning and cynicism to extract all manner of benefits and privileges from those in power. Others, finding themselves to be less adept, are left broken and demoralized. What binds them together is the tangled web of dilemmas and contradictions they face. Between Two Fires chronicles the lives of a number of strivers who understand that their dreams are best—or only—realized through varying degrees of cooperation with the Russian government. With sensitivity and depth, Yaffa profiles the director of the country’s main television channel, an Orthodox priest at war with the church hierarchy, a Chechen humanitarian who turns a blind eye to persecutions, and many others. The result is an intimate and probing portrait of a nation that is much discussed yet little understood. By showing how citizens shape their lives around the demands of a capricious and frequently repressive state—as often by choice as under threat of force—Yaffa offers urgent lessons about the true nature of modern authoritarianism. Praise for Between Two Fires “A deep and revealing portrait of life inside Vladimir Putin’s Russia. . . . Yaffa mines a rich vein, describing his subjects’ moral compromises and often ingenious ways of engaging a crooked bureaucracy to show how the Kremlin sustains its authoritarianism.”—The New York Times Book Review “Few journalists have penetrated so deep and with so much nuance into the moral ambiguities of Russia. If you want insight into the deeper distortions the Kremlin causes in people’s psyches this book is invaluable.”—Peter Pomerantsev, author of Nothing Is True and Everything Is Possible “A stunning chronicle of Putin’s new Russia . . . It celebrates the vitality of the Russian people even as it explores the compromises and accommodations that they must make. . . . This embrace of contradictions is what makes Between Two Fires such a poignant and poetic book.”—Alex Gibney, Air Mail

**Improving Adult Literacy Instruction**-National Research Council 2012-04-26

A high level of literacy in both print and digital media is required for negotiating most aspects of 21st-century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet, more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. Improving Adult Literacy Instruction synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general, and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students' proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. Improving Adult Literacy Instruction recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies.

*Clowns to the Left of Me, Jokers to the Right*-Michael A. Smerconish 2020-03-20

Opinionated talk show host and columnist Michael Smerconish has been chronicling local, state, and national events for the Philadelphia Daily News and the Philadelphia Inquirer for more than 15 years. He has sounded off on topics as diverse as the hunt for Osama bin Laden and what the color of your Christmas lights says about you. In this collection of 100 of his most memorable columns, Smerconish reflects on American political life with his characteristic feistiness. A new Afterword for each column provides updates on both facts and feelings, indicating how the author has evolved over the years, moving from a reliable Republican voter to a political Independent. Clowns to the Left of Me, Jokers to the Right covers the post-9/11 years, Barack Obama's ascension, and the rise of Donald Trump. Smerconish describes meeting Ronald Reagan, having dinner with Fidel Castro, barbequing with the band YES in his backyard, spending the same night with Pete Rose and Ted Nugent, drinking champagne from the Stanley Cup, and conducting Bill Cosby's only pretrial interview. He also writes about local Philadelphia culture, from Sid Mark to the Rizzo statue. Smerconish's outlook as expressed in these impassioned opinion pieces goes beyond "liberal" or "conservative." His thought process continues to evolve and change, and as it does, he aims to provoke readers to do the same. All author proceeds benefit the Children's Crisis Treatment Center, a Philadelphia-based, private, nonprofit agency that provides behavioral health services to children and their families.

Praise for the previous edition: "[A] fascinating book." John Thackara, Doors of Perception "Provides the foundations for a radical new perspective." Ethical Pulse "At last a book that dispels the idea that fashion is only interested in trend-driven fluff: not only does it have a brain, but it could be a sustainable one." *The Artist and the Assassin*-Mark Futkin 2021-08-13

Rome, 1600. In the shadowed cellars of Cardinal Del Monte's palazzo, a shaft of light illuminates the face of Luca Passarelli. Across the room, behind an enormous canvas, the brilliant, mercurial artist Michelangelo Merisi da Caravaggio paints with sure brushstrokes Luca's likeness into a new masterpiece. Caravaggio is both revered and reviled by his patrons as well as his fellow artists. His innovative paintings and his blazing temper have made him powerful friends, but also powerful enemies—enemies who are determined to quench the flame of his talent. What Caravaggio does not know is that Luca is a professional assassin, a bitter and spiteful man who, in his dark past, has 'breathed in death' and has committed murder on multiple occasions. What the artist does not know is that when next they meet it will not be a canvas that brings them together, but rather revenge ... and death.
